RE: Board Memo 7-5 - Adopt CEQA determination and authorize entering into a Local Resources Program agreement with the City of Torrance and the Water Replenishment District of Southern California for the Groundwater Reliability Improvement Program Recycled Water Project - **OPPOSE**;

NOTICE OF NON-LIABILITY AND DISCLAIMER OF FINANCIAL OR CONTRACT RESPONSIBILITY ASSOCIATED WITH BOARD MEMO 7-5; RESERVATION OF RIGHTS; AND NOTICE OF INTENT TO SEEK RECOVERY OF ILLEGAL RATES, FURTHER AWARD OF PREJUDGMENT INTEREST AND OTHER RELIEF

Dear Chairman Record and MWD Board Members,

We have reviewed Board Memo 7-5 and OPPOSE the board action for the reasons stated in this and many prior letters on the subject of MWD's illegal rates and subsidy programs (and other subjects such as the IRP), all of which are incorporated herein by reference, including but not limited to the following:

- Under California law, including Proposition 26, MWD is required to set rates that do not exceed the reasonable costs of providing the service for which the particular rate is being charged. MWD must also show that the manner in which its costs are allocated and rates charged among member agencies bears a reasonable relationship to the respective burdens on and benefits those customers receive from MWD. MWD is required to make these determinations on a factual record. However, MWD has failed to do so by any cost of service analysis, in Board Memo 7-5, or otherwise.
- While Board Memo 7-5 includes a declaration that the Local Resources Program (LRP) "benefit[s] all member agencies regardless of project location," MWD offers no evidence of such a regional benefit. To the contrary, the Board memo identifies the specific member agency and third party non-member agency that will benefit from these payments, namely, the City of Torrance (MWD member agency) and Water Replenishment District of Southern California (WRD) (third party non-member agency), the latter of which will own, operate and receive the water supply benefits of the project.ⁱ

- MWD has judicially admitted that its LRP benefits only the local, individual member agencies receiving subsidy payments, and has expressly denied that there are any regional water supply benefits.ⁱⁱ Statements in Board Memo 7-5 purporting to justify payment of these subsidies on the basis of a self-declared regional water supply benefit are directly contrary to representations MWD has made to the trial court and court of appeal in the Water Authority rate litigation. Moreover, in this case, MWD is paying financial subsidies to a third party, non-MWD member agency that will own, operate and benefit from this local water supply, but which does not directly pay any MWD water ratesⁱⁱⁱ and has many customers that do not pay any MWD water rates and charges.
- There is no demonstration that this project is needed in order to reduce demand for MWD imported water supplies.^{iv} In arbitrarily relying on the 174,000 AFY LRP goal set nearly 10 years ago, in 2007, upon which the October 2014 board authorization is purportedly based, MWD is intentionally choosing to ignore changed circumstances and rely on outdated data. In its own planning projections, MWD reduced the 2035 demand for MWD water from 1,931,000 AF in its 2010 Regional Urban Water Management Plan (RUWMP) to 1,726,000 AF in its 2015 RUWMP; this reduction alone would completely eliminate any need for this project by MWD, even if the payment source were not illegal, which it is.
- MWD has not demonstrated any need to "free up conveyance capacity to the benefit of all system users," and none can be demonstrated as a matter of fact. Due to the reduced demand for MWD water, now and in the future, MWD has excess capacity and no constraints that this project will "free up" to the benefit of any, let alone all, users of MWD transportation facilities.
- MWD does not have any "legislative mandates"^v that require it to subsidize local water supply development for the customers of the City of Torrance or WRD; on the other hand, MWD does have a common law, statutory and Constitutional mandate to assign the costs it incurs proportionally according to benefits received by its customers. The costs of this water supply must be assigned to the MWD member agency beneficiary, the City of Torrance.^{vi}
- The Water Stewardship Rate has already been determined by the Superior Court to be an illegal tax and MWD is on notice that the Water Authority will seek recovery of all Water Stewardship Rates paid if the trial court's judgment is upheld on appeal. The Water Authority also puts MWD and the City of Torrance on notice that it objects to being charged the WSR or having any financial responsibility now or in the future for any costs of LRP contracts entered into by MWD. In addition to the reasons stated above, Water Authority ratepayers have been barred by the MWD board's June 2011 action from receiving any WSR benefits.

While we strongly support the kind of local water supply development represented by this recycling project, MWD is knowingly funding this project with illegal rates, with the knowledge that these water supplies are not needed by and will not benefit MWD's regional customers as MWD now claims. As a result, this contract is void or voidable. The Water Authority expressly disclaims any

direct or indirect financial or contractual responsibility for this project or future subsidies to be paid by MWD. The Water Authority hereby gives MWD, its member agencies, rating agencies and all interested persons NOTICE OF ITS INTENT TO SEEK RECOVERY OF ILLEGAL RATES, FURTHER AWARD OF PREJUDGMENT INTEREST AND OTHER RELIEF.

Sincerely,

Michael T. Hogan

Fern Steiner
Director

ⁱ The Groundwater Reliability Improvement Program (GRIP) is an excellent example of the kind of local projects being developed to reduce demand on water imported from the Bay Delta. WRD's objective is to use no MWD water in the future, for the benefit of the specific ratepayers that will pay for and receive the benefits from GRIP. See <http://www.lacsd.org/civicax/filebank/blobdload.aspx?blobid=6778>.

ⁱⁱ For example, MWD has stated that, "'supplies'...refers to the local member agencies' water supplies, not a supply related cost or benefit for Metropolitan. Conserving and developing the local member agencies' water supplies has nothing to do with Metropolitan's water supplies, which are imported from outside its service area. The superior court erred in confusing the two." Appellants' Opening Brief at pages 80-81.

ⁱⁱⁱ As noted on its website, WRD manages groundwater for nearly four million residents in 43 cities of southern Los Angeles County. The 420 square mile service area uses about 250,000 acre-feet of groundwater per year, which equates to nearly 40% of the total demand for water. The WRD ensures that a reliable supply of high quality groundwater is available through its clean water projects, water supply programs, and effective management principles. Six MWD member agencies are located within the Central and West Coast Basins managed by WRD. For more information about WRD, see <http://www.wrd.org/about/water-district-history.php>.

^{iv} See January 10, 2016 letter RE Board Memo 8-3: Adopt the 2015 Integrated Water Resources Plan Update - REQUEST TO DEFER BOARD ACTION ADOPTING 2015 IRP UPDATE, OR IN THE ALTERNATIVE, OPPOSE

^v SB 60 (Hayden) was signed into law in 1999, to prohibit MWD from engaging in certain deceptive and political practices and requiring it to establish an Office of Ethics. SB 60 requires MWD to place increased emphasis on planning for more sustainable, environmentally sound, and cost-effective water supply including conservation, recycling, and groundwater storage and replenishment measures. Contrary to MWD's arguments on appeal and at trial, SB 60 does not address, let alone require, MWD to pay for some of its member agencies' local projects.

^{vi} MWD has no apparent authority to assign or collect costs directly to or from WRD, which is not a MWD member agency.
